Denpasar, Bali, Indonesia • +62 859-6401-9661 • diolubiss@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Full-Stack Developer with hands-on experience building scalable web and mobile applications using React.js, Next.js, TypeScript, Golang, PostgreSQL, Supabase, Firebase, and REST APIs. Experienced in developing recruitment platforms, AI-powered candidate screening workflows using Google Gemini API, and hospitality/event management systems. Strong in frontend-backend integration, database-driven applications, and collaborative product development.

WORK EXPERIENCE

New Directions Agency - Guestlist.id | 2025 - PRESENT

Full-stack Web & Mobile Apps Development

- Developed and maintained Guestlist.id, a hospitality and nightlife booking platform that supports guest list reservations, VIP table bookings, service discovery, customer booking management, and partner operational workflows.
- Built and improved customer-facing web features using React.js, Next.js, and TypeScript, focusing on responsive UI, booking flow usability, service detail pages, and smooth user interaction.
- Developed backend services using Golang, PostgreSQL, and Supabase to handle service data, booking records, customer information, package management, and API integrations across the platform.
- Worked on mobile app features using Expo and Firebase, supporting cross-platform access for booking-related flows and customer experience improvements.
- Collaborated with UI/UX, product, and engineering teams to translate business requirements into stable, scalable, and production-ready features for hospitality, nightlife, and event-based services.
- Improved platform reliability and maintainability by supporting frontend-backend integration, API testing, database structure adjustments, and bug fixing across web and mobile systems.

THESIS PROJECT

Karierly | 2025 - Present

Full-stack Web Developer

- Developed an AI-powered Applicant Tracking System for managing job postings, candidate pipelines, application records, and recruitment workflows.
- Built frontend features using React.js and TypeScript, including career pages, candidate application flow, and recruiter dashboard interfaces.
- Developed REST APIs using Golang and PostgreSQL to manage recruitment data, user roles, job vacancies, and candidate progress.
- Integrated Google Gemini API for AI-powered candidate screening, resume analysis, and job matching recommendations.

EDUCATION

UDAYANA UNIVERSITY | 2023 - Present

Bachelor of Information Technology

- GPA: 3.59/4.00
- Focusing on full-stack web development and actively involved in campus organizations, committees, and study groups to continuously improve skills and knowledge

SMK Negeri 1 Denpasar - Vocational High School | 2021 - 2023

Major in Multimedia

- Studied multimedia design, digital content creation, and visual communication
- Developed skills in graphic design, video editing, photography, and basic web design
- Participated in school projects and collaborative multimedia productions

SKILLS & OTHER

Frontend Development: React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Responsive Web Design

Backend Development: Golang, PHP, Laravel, REST APIs, JWT Authentication, API Integration

Mobile Development: Expo, React Native, Kotlin, Android Studio

Databases & Backend Services: PostgreSQL, MySQL, Firebase, Supabase, Redis

AI Integration: Google Gemini API, AI-Powered Candidate Screening, Resume Analysis

Tools & Collaboration: Git, GitHub, GitLab, Postman, Figma, Docker

Languages: Indonesian Native, English Professional Working Proficiency.
